To Whom It May Concern,

I am writing to recommend Raphael Ndonga Kibicho, who served as a Software Developer at Metaverse Architects Limited. Raphael's technical expertise, innovative thinking, and dedication to his work have been invaluable to our team and projects.

During his time with us, Raphael made significant contributions to several high-profile projects, showcasing not only his technical skills but also his ability to understand and implement complex digital solutions.

For the UBS project, Raphael skillfully developed both the frontend and backend of the CMS system for the UBS decentraland scene. His proficiency in Javascript, Typescript, NextJS, NodeJS, and MongoDB was evident in the seamless functionality and user-friendly interface of the system. Additionally, his pitch on NFT functionality to UBS clients was both insightful and forward-thinking, demonstrating his deep understanding of current trends and technologies in digital environments. Although the NFT distribution functionality for this project was not implemented in the end, Raphael's preparation using Solidity and Hardhat was thorough and innovative.

In the Roobet project, Raphael successfully deployed NFT distribution functionality to the scene in Decentraland. His expertise in Solidity and Hardhat was crucial in bringing this feature to life, enhancing the overall user experience in the virtual environment.

Furthermore, Raphael's work on the Diamond Heads & Groundbreak Ventures projects was exemplary. He created engaging and interactive scenes in Decentraland using Typescript and DCL-SDK, showcasing his ability to translate conceptual ideas into tangible digital experiences.

Raphael's contributions extend beyond his technical skills. He is a collaborative team member, always willing to share his knowledge and assist his colleagues. His positive attitude and commitment to excellence have made a significant impact on our team dynamics and overall productivity.

I am confident that Raphael will continue to demonstrate the same level of professionalism, innovation, and dedication in any future role he undertakes. He would be an invaluable asset to any organization, and I recommend him without any reservations. Please feel free to contact me if you need further information or specific examples of his work and contributions.

Sincerely,  
  
Michael Cutajar  
CEO
